EDUCATION

United Institute of Technology

Bachelor of Science - AI/ML; GPA: 7.5

Gandhinagar, India

September 2022 - April 2026

- **Courses:** Artificial Intelligence, Machine Learning, Networking, Cloud Computing, Databases, Operating Systems, Data Structures

SKILLS SUMMARY

Languages: Python, SQL, R, C++, Rust

AI/ML: Neural Networks, Fine-tuning, LLM, RAG, CNN, RNN, Transformers

Frameworks: TensorFlow, PyTorch, Keras, Scikit-learn, Langchain, FAST API, Llamaindex

Tools: RStudio, WEKA, Vertex AI, AI Foundry, HuggingFace, N8N, LangchGraph

Databases: PostgreSQL, MySQL, ChromaDB, Vector DB, Data Warehouse, Supabase, Pinecone

DevOps: Docker, GIT, AWS, Azure, Apache HTTP Server, Postman

Soft Skills: Leadership, Communication, Critical Thinking, Problem Solving, Team Work, Time Management

EXPERIENCE

Rysyth technologies

Applied AI Engineer

Ahemdabad,Hybrid

July 2025 - Present

- Building end-to-end AI powered application for clients based on their needs.

Zensible

AI Engineer

Bangalore, Hybrid

April 2025 - July 2025

- Built AI applications delivering business value; Created HRMS bot for HR automation and employee chat-based queries.

Amaze Inc

AI Consultant

Bangalore, On-Site

January 2025 - April 2025

- Transformed complex datasets into strategic insights and architected custom AI solutions for data-driven decisions.

Brand Shark

AI Engineer Intern

Bangalore, On-Site

November 2024 - January 2025

- Analyzed and visualized data, delivered actionable insights to support business decisions.

UIT, Gandhinagar

Assitant Principal Investigator

Gandhinagar, India

October 2023 - March 2024

- Conducted research for project development and monitored progress to ensure timely completion within budget.

PROJECTS

Speech-to-Speech AI Assistant: Developed voice AI system using AWS Polly, Google Speech-to-Text, and LLM integration with audio preprocessing pipeline.

RAG Document Q&A System: Built retrieval-augmented generation system using LangChain and ChromaDB, fine-tuned Mistral/Llama models.

Business Intelligence Dashboard: Created BI dashboards with Power BI, designed ETL pipelines for data warehouse integration.

Neural Network Classifier: Implemented CNN/RNN models with PyTorch achieving 92% accuracy through optimization.

AI API Development: Designed scalable REST APIs with FAST API, containerized with Docker and deployed on AWS.

CERTIFICATIONS

- **Azure AI Fundamentals** (Udemy) - Core Azure AI services and principles [Issue Date: Oct 2025]
- **Docker** (LinkedIn Learning) - Containerization technology and orchestration [Issue Date: Aug 2025]
- **AI Automation: Build LLM Apps & AI-Agents with n8n & API's** (Udemy) - LLM application development and process automation [Issue Date: Jul 2025]
- **Supervised Machine Learning: Regression and Classification** (DeepLearning.AI) - Advanced supervised learning techniques [Issue Date: Jun 2024]
- **Data Processing and Manipulation** (University of Colorado Boulder) - Data cleaning and feature engineering [Issue Date: Jun 2024]
- **Ethical Hacking** (NPTEL) - Network security and penetration testing [Issue Date: Oct 2023]
